7 Easy Ways to Make Money Online

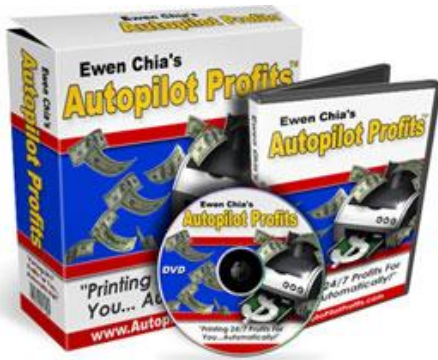

If you've been struggling to find a way to make money online without making a huge investment and without spending months learning how to build a website, then you'll love the systems described in this report.

I've done my best to identify several legitimate, affordable, AND easy ways to make money online. You can build a complete business from each of the seven systems, or you can use them to add revenue streams to your current business.

At first glance, this report may look like a sales pitch for a bunch of products, and to some extent, it is. However, most of the products are ones that I personally own and use. The others are products that I have researched extensively and intend to utilize in the future when I have time to take on more projects.

Without further ado, let's get you on your way to making some cash . . .

1 – Ewen Chia's Autopilot Profits™

[Autopilot Profits™](#) is about as close to a “business in a box” as you can get. Ewen Chia’s product consists of video tutorials (plus a PDF manual) that explain, step-by-step, how to set up an online business that runs almost completely on autopilot.

The beauty of this product is that it’s an “earn while you learn” type of system. You can either go through all of the steps required to find and market a product, or you can simply use the marketing strategies discussed in the videos to promote the [Autopilot Profits™](#) product itself for a 75% commission.

The main advantage to the latter is that Ewen has done most of the work for you. He’s created a valuable product in a niche with hungry buyers, as well as a sales letter that converts extremely well.

In addition to your 75% commission on the front-end, you’ll have the opportunity to make hefty commissions on two back-end sales. Because of the way that Ewen has set up the system, you can earn a total of \$105.75 from three different products, just by promoting [Autopilot Profits™](#) alone. You don’t need a website, and you don’t need to spend any money on advertising (unless you choose to). All you need to do is follow the instructions in the videos, and Ewen will take care of the rest.

Now, a high-converting sales letter is all well and good, but what about the product itself? Can it really help you learn Internet marketing?

Absolutely. In fact, I was pleasantly surprised with the quality of this product. Ewen gives you just enough information to be successful right out of the gate, but not so much information that you become overwhelmed and frustrated.

You can go through the whole course in less than two hours and begin promoting [Autopilot Profits™](#) immediately afterward using a couple of free, short-term traffic strategies. (Other traffic strategies discussed are longer term and will require more time to implement.)

Ewen designed the product specifically to make it easy for people to make money with it. All you need to do is take action and follow his instructions. If you do that, I don't see how you could fail to make money with this system.

Furthermore, Ewen has made this product very affordable so that almost anyone will be able to use it. Unlike most courses of this nature, it's NOT going to set you back \$97, \$77, \$67, or even \$47 . . .

You can see the **ridiculously low price** here:

AutopilotProfits.com

2 – Alex Edevane’s 1% M.O.L.B. Wealth Formula

The [1% M.O.L.B. Wealth Formula](#) is responsible for allowing its creator, Alex Edevane, to pocket over \$500,000 in *less than 15 months*.

“M.O.L.B.” stands for both “Mechanical On-Line Blueprint” and “Mechanical Online List Builder”, while the “1%” refers to the elite 1% of wealthy online marketers who use article marketing and list building strategies that are unknown to 99% of the people who are trying to make money online.

You may already be familiar with article marketing as a way to build your list, but I can almost guarantee that the [1% M.O.L.B. Wealth Formula](#) is article marketing like you’ve never seen . . .

Alex reveals a powerful strategy that very few people know about (a strategy that many “gurus” deliberately keep to themselves), and that’s one of the features that makes his course stand out from all of the other guides on article marketing and list building. I’ve been studying Internet marketing since 2001, and I’d never heard of this strategy before. As soon as I did, though, I had one of those “Ah-ha” moments.

I was also impressed with the level of detail that Alex goes into when explaining his system. He doesn’t just say, “Write some articles and submit them to directories.” Rather, he tells you exactly what kinds of articles to write, how to

write them, how many to write, where to submit them and how often, and much more.

Alex even gives an example of a landing page and autoresponder sequence that he personally uses. (Not many Internet marketers will dare to reveal their niches, lest they'll create too much competition for themselves.) As if letting you peer inside of his business weren't enough, Alex also gives you a collection of nearly 3,000 articles that you can use for reference and inspiration.

Don't have time to write articles? Don't even want to think about writing articles? No problem. Article writing can be outsourced very cheaply, and Alex goes into great detail about how to do this. Unlike most instructors, he doesn't just say, "Go to elance.com and look for people to write your articles for you." He gives you a specific set of instructions to follow, complete with an example of how to approach potential freelancers to ensure that you get the best deal.

You might be thinking that the [1% M.O.L.B. Wealth Formula](#) is just an over-priced, over-hyped course on article marketing, and that you can get all of this information online for free just by searching Google. However, nothing could be further from the truth. While there are many article marketing tutorials online, none of the ones that I have seen go into as much detail as Alex does. It's important to note that "the devil is in the details", and if you make the same mistakes that most article writers make, then you'll earn little or no money.

Furthermore, the [1% M.O.L.B. Wealth Formula](#) is not just an in-depth article marketing course. The use of articles to build a list is only one of the two strategies that Alex discusses. The other list building strategy is one that the elite "1%" of rich Internet marketers have been keeping to themselves because it's so powerful. **This method alone is worth many times the investment in the course.**

TIP: If you decide that you want to invest in the course, then I recommend that you attempt to close your browser window (or tab) WITHOUT clicking on the order link. Doing so should bring up a chat window that offers you a discount on the product.

The last thing I'd like to mention is that throughout the course, Alex emphasizes that you should make things "as easy as possible" for your customers, and he does the same by making it as easy as possible for YOU to succeed.

3 – E-Commerce for Everyone

www.ecommerceforeveryone.com

E-Commerce for Everyone (E4E) is an Application Service Provider (ASP) that has teamed up with Amazon.com to develop a unique online platform that allows you to create your own Amazon e-commerce storefront in a matter of minutes. With an **E4E** Amazon Storefront, you can enjoy the benefits of a dynamic Amazon.com online store solution with unique features including:

- Order processing and shipping provided by Amazon
- Absolutely no products to stock
- No merchant account necessary
- Fully customizable storefront
- One of the largest scopes of product offerings available
- Automated merchandising
- One of the best logistic systems in the world
- No programming knowledge needed
- No risk of credit card fraud
- The ability to build your own brand
- Real time shopping cart information on every page
- Direct deposit to your bank account or pay by check
- Custom styles for your site
- Search engine friendly site
- Much, much, more...

Earlier, I mentioned that Ewen Chia's [Autopilot Profits™](#) is about as close to a "business in a box" as you can get. Well, I take that back – **E4E** is even closer. The developers of this solution have literally done everything for you except for the marketing of your site (more on that later).

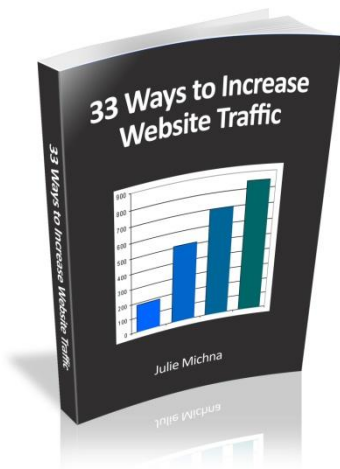

E4E takes care of the web hosting as well, so there's no software for you to download and then install on another host. After joining the Amazon Associates

Program (it's free), you'll be able to create an online store in minutes via your **E4E** control panel, and then all you have to do is drive targeted traffic to the site.

Even though your **E4E Amazon Storefront** will be search engine friendly, I recommend that you not rely solely on getting traffic to this type of site through the search engines. The reason is that as E4E's business grows (they're a fairly new company), many people will have the same or similar E4E stores (just on different domains), and the search engines will see this as duplicate content. Therefore, your site won't rank as highly as it otherwise might.

E4E offers marketing assistance – for an additional fee – but in my opinion, one of the best (and cheapest) ways to drive traffic to your storefront is simply through [article marketing](#). If I were setting up one of these stores (which I intend to do in the future), then I would choose a specific category of products from Amazon and build the store around that niche. My next step would be to write several articles and submit them to both general article directories and niche-specific directories, as well as any ezines that may exist within that niche.

I would also use methods that I discuss in [33 Ways to Increase Website Traffic](#), which you can download for free:

4 – Jean-Philippe Schoeffel's *Niche Video Site Builder*TM

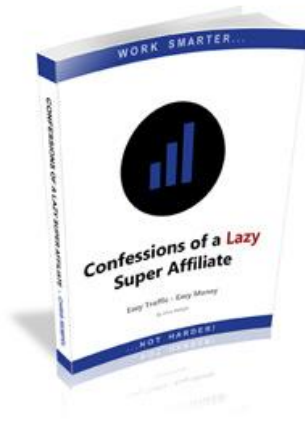

[Niche Video Site Builder](#) is exactly what its name says that it is. This software allows you to quickly and easily build websites featuring an assortment of videos in your chosen niche.

The script automatically identifies appropriate videos hosted at YouTube.com and provides a convenient list of these videos on your website, which will be monetized with Google AdSense. If you're comfortable editing the templates, then you could also include ads for relevant affiliate products. If you want to take it a step further, you could use this site to build a list on autopilot.

When Jean-Philippe says that you can literally build and promote one of these sites in "2 minutes", he isn't kidding. I encourage you to [watch his video](#) demonstration of just how easy it is.

5 – Chris Rempel’s *Confessions of a Lazy Super Affiliate*

[Confessions of a Lazy Super Affiliate](#), by Chris Rempel, is an outstanding ebook for anyone who’s big on “set it and forget it” types of money making systems. Chris offers several strategies for making recurring income from projects that take only a couple of days to complete.

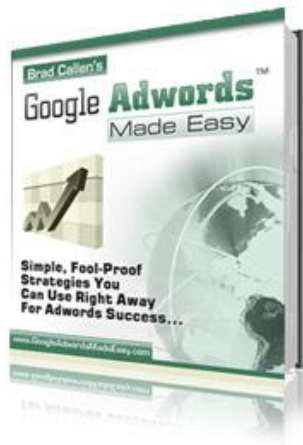

Unlike most product creators who are secretive about what’s contained in the product that you’re buying, Chris makes it very clear what his ebook is about, and **he even gives away one of his strategies right in the sales letter.**

I encourage you to read the sales letter, if for no other reason than to see how different (and refreshing) it is.

If you want to skip right to the part where he gives away one of his methods, then look for these words in the sales letter:

“Part 3: Unleash a Wave of Traffic You *Couldn't* Stop if You Tried...”

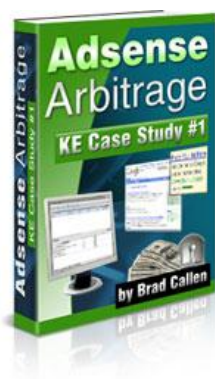

6 – Brad Callen’s *Google AdWords Made Easy*

[Google AdWords Made Easy](#), by Brad Callen, is a FREE ebook that you can use as both a learning tool and a money-making tool. This 83-page manual will not only teach you how to make money with Google AdWords, but it will also allow you to potentially earn a \$93 for every copy of the book that you sell or give away to others. Here’s how it works:

[Google AdWords Made Easy](#) is designed to promote Brad’s [Keyword Elite](#) software, which sells for \$176. When you download the free ebook, you’ll be able to brand it with your affiliate link for [Keyword Elite](#). You can then sell or give away the branded ebook, and whenever someone purchases Keyword Elite through your affiliate link, you’ll make a **\$93 commission**.

You can do the same with another of Brad’s free ebooks, [AdSense Arbitrage](#).

7 – Jim Cockrum’s Creative eBay Selling Newsletter

Jim Cockrum is well known for his thinking “outside the box” when it comes to ways of making money on eBay. If you think that eBay is too crowded and too competitive, think again.

Jim always manages to find ways to stand out from the competition, and he shares many of his tips in his [Creative eBay Selling Newsletter](#), which is absolutely **FREE**.

If you’ve ever asked yourself:

- "How can I make money on eBay?"
- "Can I be successful on eBay?"
- "Are people really making thousands of dollars a month?"
- "Can I make that kind of money in my spare time?"

Then I highly recommend that you [subscribe](#) to Jim’s newsletter.

Conclusion

I hope that you enjoyed this report and that you were able to find a money making solution that works for you. I welcome and appreciate your feedback, so if you have any questions or comments about **7 Easy Ways to Make Money Online**, feel free to send me an email:
